2. See our video instruction by searching on YouTube or xbrand.us site- Search: **XBrand FM868BL** on a step by step instruction.

PART 3:

MAINTENANCE AND CARE

1. USE ONLY MINERALIZED WATER OR TAP WATER. Distilled water can reduce the effect of the mist or not allow it to mist at all. Minerals in the water allow the sensor to work due to its conductivity. IF FOR SOME REASON-YOUR ITEM STILL DOES NOT FOG- WHENYOU ADD TAP WATER- add a ¼ spoon of salt to the water, and you should see it fog immediately (This allows the sensors to sense the ions in the water).
2. Drop a couple of drops of your favorite essential oil in this mist fountain for relaxing aromatherapy.
3. The changing LED Lamp generates comfortable & relaxing lighting.
4. Our unique patent pending inline control mist maker can be set to any color by pressing the button and selecting the desired color. You can also select two different mist levels; high and low.
5. When the water runs below the sensor, the mist and lights will turn off.
6. Once you add water, press the mist button again and within two seconds it will start misting.
7. When the water-level is low, the sensor will automatically shut the fogger unit off. The auto-shut off protects the ceramic disc from running dry.
8. Please go on our website for any updates on care and maintenance.
9. **DO NOT DROP THE INLINE CONTROLLER IN THE WATER- ITEM WILL STOP WORKING.**

PART 4:

WARRANTY RELATED ISSUES

1. All of XBrand items have a one-year limited warranty.
